## Seasonal Services

Throughout the gardening year, there are a series of essential tasks that, when executed at the optimal time, will enhance your garden's health and beauty for the entire season. Our horticultural professionals apply the knowledge and skills gained from some of the world's finest gardens to elevate your outdoor space. You can select the services that best suit your garden's needs, maintenance schedule, and budget.

---

### Early Spring: Restore

**Mulching & Border Preparation:** The foundational work to set your garden up for the season. Perennial refreshing, organic feeding, and high quality mulching to suppress weeds and retain moisture.

---

### Late Spring: Refresh

**Summer Border & Pot Preparation:** Transitioning the garden towards the summer peak. Includes deadheading of spring bulbs, late season pruning and replanting of pots and borders with seasonal annuals and perennials.

---

### Summer: Spruce Up

**Border Maintenance:** Dedicated care to help your garden thrive through the heat. We focus on feeding, weeding, and watering, alongside the tying-in of climbers and the planting of late-summer annuals to extend the flowering season.

---

### Autumn: Future Colour

**Bulb, Perennial and Shrub Planting:** Taking stock at the end of the growing season to edit and improve your borders. We integrate new bulbs and perennials into your pots and borders to ensure a vibrant display the following spring.

---

### Winter: Structure

**Specialist Pruning:** Essential structural maintenance for shrubs, climbers, and small trees to encourage vigorous, healthy growth and maintain an elegant silhouette for the coming year.
